Masters programmes Shell offers [Students and Graduates opportunities](#) worldwide and work across a variety of functions. Duration of the programme can be from 2 – 5 years, depending on the role. This will include two or three rotations that combine on-the-job learning with formal training opportunities. Internships are open to students in any year of study and the Graduate programme is opened to graduating students or anyone with less than 3 years of work experience. Please check that you are eligible to work in the chosen country/location before applying for a specific role. For further details of the Graduate Programme, click [here](#). The company also offers [Internship opportunities](#). It is open to students in any year of study. Succeed in your Assessed Internship and you could be offered a place on the Shell Graduate Programme.

How to apply There are two routes into Shell: an [Assessed Internship](#) (open to students in any year of study), or a place on the [Graduate Programme](#) (open to graduating students or anyone with less than three years' working experience). Interested candidates can visit [Degree Matcher](#) to search for a role that matches your degree or your job area. Candidates are required to be eligible to work in the country where the programme is based.

Key dates Applications for many of the 2018 Shell Graduate Programmes are now being sought. The closing date varies by location. Applications for the UK full-time programme will close 30th November 2017 and 31st December 2017 for the Assessed Internship Programme.

International Opportunities Job opportunities are available worldwide.

Additional Information Headquartered in The Hague, the Netherlands, Shell is a global group of energy and petrochemical companies. The parent company of the Shell group is Royal Dutch Shell plc, which is incorporated in England and Wales. In Upstream, the company focuses on exploring for new oil and gas reserves and developing major projects where its technology and know-how adds value to the resource holders. In Downstream, its emphasis remains on sustained cash generation from the existing assets and selective investments in growth markets. The company has an average number of 92,000 employees in over 70 countries.

Masters programmes	<p>Each year, the company offers 4,000 internships and 1,000 work-study Co-op Placements in its affiliates worldwide. These programs are targeted at post-secondary students from a wide range of backgrounds. Assignments are available in every professional discipline, at corporate headquarters and in refineries, regional offices and affiliates in France and worldwide. They are open to applicants from any background. Full details of current projects can be found on Total's Campus website.</p> <p>Each year, about 120 young Europeans accept a VIE co-op placement in its affiliates worldwide. The program is open to graduates from the European Economic Area with five years of post-secondary education. Successful candidates spend 12 to 24 months in business, with responsibilities covering the full spectrum of its technical, commercial and support professional disciplines. An additional 20 or so students are recruited each year to participate in the Volunteer for International Science (VIS) program. The students take part in R&D projects in a variety of fields, including geology, process engineering and chemistry.</p>
